All the bells are made of steel and powder coated with a durable weathering textured coating on the outside surface. The bells offer many years of pleasure to the owners. Countless customers will purchase more than one bell to enjoy a melody of sounds in the winds. There are many designs and themes of windcatchers that are functional in catching the wind hung from each bell. These are included in the wholesale cost of each bell. Be sure to hang the wind bells so folks can hear them, they will sell themselves!

We stand behind our work. If for any reason there is a question on your order, by all means...please call us. If there is any discrepancy, this must be brought to our attention within 7 days of receipt. A re-stocking charge of 30% will be charged against any returns and must be cleared first with customer service for permission.
